20th of Feb. 2010

Workshop (registration through CdT)

The workshop will take place in the Monographic Museum of Conimbriga, Condeixa (registration at CdT)

Registration. 50€. Members of the Ass. Centre of Earth
80€. Other participants

Limit of participants. 30 people

Purpose. To acknowledge the potentialities of earth as a constructive material, nowadays.

Structure. Practical classes.

Comments. Do not pay for the workshop, before confirming the existence of open places.

E-mail para registration. info@centrodatterra.org

21st and 22nd of Feb. 2010

Seminar

Registration: General.

100€, until 30th of September
150€, after 30th of September 2009

Members of CdT and Students.

100€, until 30th of September
120€, after 30th of September 2009

Speakers.

100€, until 30th of September
120€, after 30th of September 2009

Registration only in one day of the Seminary: 100€

Comments. Registration includes lunches, coffee-breaks and the Proceedings CD.

E-mail for registration. 6atp9siacot@gmail.com

23rd of Feb. 2010

Visit

Visit to Conimbriga and the adobe vernacular architecture

Registration. 35€

Comments. The registration includes lunch. The departure and the arrival are from the University of Coimbra

21st of Feb. 2010

Conference's Official Dinner

The official dinner of the Conference will take place at 8.00p.m. in Coimbra.

Registration. 20€

E-mail for registration. 6atp9siacot@gmail.com

Participation with Paper

The Abstract must be sent until the 30th of June 2009. If accepted, the final paper is required to be sent until the 30th of September 2009. Format requirements for the paper can be checked on the website. All the papers will be review by the Scientific Committee. Authors will be notified of the evaluation until the 15th of November. The final paper delivery must be accomplished until the 15th of December 2009.

The final papers will be edited at the Proceedings CD and if possible, in paper Proceedings. The Scientific Committee holds the right to request a revision of the paper, if it lacks the adequate quality and rigor.

Resumos

The abstracts shall include: (see model on the website)

- . Name of the Authors;
- . Institution;
- . Contacts (email, telephone);
- . Description from 300 to 500 words;
- . Short approach to framework / background;
- . Paper's aims;
- . Short curriculum for each author (50 words).

Aims

To emphasise and to widen the disciplinary scope of earthen construction and heritage; To promote the debate and the transference of knowledge, aiming at the stimulation and the accomplishment of common projects involving archaeology, architecture, engineering, anthropology and other disciplines that find interest in this subject area.

To encourage the university contribution in the research sphere related to the construction and conservation of earthen architecture; to further the improvement in the quality of the construction; to take part in the formation and subsequent preparation of technicians in the construction and conservation of earthen architecture; to deepen and to contribute for the sustainable development at local and national scales; to disseminate the earthen contemporary architecture, promoting the use of natural materials with larger energy efficiency, as well as strategies for local training, with rising social integration.

Framework

The CEAUCP - Centre of Archaeological Studies from the Universities of Coimbra and Oporto / FCT - Foundation for Science and Technology, UC - University of Coimbra, ESG/Escola Superior Gallaecia, FCO/Foundation Convent of Orada, CdT/Association Centre of Earth and the Iberian-American Network PROTERRA are the organizers and hosts of the 6th ATP - Seminary of Earthen Architecture in Portugal and the 9th SIACOT - Iberian American Seminar of Earthen Architecture and Construction that will occur from the 20th to the 23rd of February 2010, in Coimbra, Portugal.

Created in 2003, the seminar of Earthen Architecture in Portugal (ATP) has developed increasingly, with a wide participation of professionals, researchers and academics. In 2003 and 2004, the 1stATP and the 2ndATP occurred in Lisbon; in 2005, the 3rd ATP congregates with the 4thSIACOT in Monsaraz; in 2006, the 4th ATP took place in Ouro Preto, Brazil (the 1st ACTB joined this 4th ATP, originating the EarthBrazil 2006); and in 2007 the 5th ATP took place in Aveiro. The seminar grows in dimension, in range and in increasing investigation, acquiring a remarkable reach in the study and protection of the heritage, architecture, techniques, construction, conservation and in general research of earthen architecture. The ATP seminar also encloses a wider internationalisation and interdisciplinary attribute between earthen architecture and other fields of study, such as engineering, history, conservation, archaeology and anthropology. The quality of the papers, the general public and scientific community's increasing interest sustain and denote the international magnitude and the Portuguese contribution for the development of this scientific area.

Organization

CEAUCP. Centre of Archaeological Studies from the Universities of Coimbra and Oporto
 ESG. Escola Superior Gallaecia
 FCO. Foundation Convent of Orada
 CdT. Association Centre of Earth
 PROTERRA. Iberian-American Network of Earthen Architecture and Construction

Organising Committee

Maria Conceição Lopes, UC, CEAUCP
 Maria Fernandes, CEAUCP, CdT, PROTERRA
 Mariana Correia, ESG, FCO, CdT, PROTERRA
 Teresa Beirão, CdT
 Luis Fernando Guerrero Baca, PROTERRA

Papers

30th of June 2009 Sending of Abstracts
 15th of July 2009 Acceptance of Abstracts
 30th of Sept. 2009 Sending of Papers
 15th of Nov. 2009 Papers review
 15th of Dec. 2009 Final Papers delivery

Themes

1. Archaeology, Art and Anthropology
2. Heritage and Conservation
3. Techniques, Construction, Research and Development
4. Vernacular and Contemporary Architecture

Language (without translation)

Portuguese, Spanish and English
